

COMMERCIAL BUILDING AWARD: CASTLES COMPLEX CARLISLE, PA

AWARD-WINNING GENERAL CONTRACTOR

BEFORE

Castles Lumber and Home Center was constructed by us in 1980, with an addition in 1990. The original structure is a pre-engineered building sheeted with metal wall panels and T-III siding.

The transformation began by framing custom openings for new doors and windows, constructing a custom canopy out of light gauge metal framing, and wrapping the existing building with stepped parapet walls.

Special attention needed to be given while covering the exterior. All doors, windows and masonry pilasters were carefully coordinated from design through construction in order to work with both existing and new wall panel modules.

COMMERCIAL BUILDING AWARD

AFTER

The 16,000 sq.ft. former Castles Lumber and Home Center has undergone a complete facade enhancement. The owner requested a durable, yet economical, design to complement an adjacent 30,000 sq.ft. shopping center also constructed by Galbraith Pre-Design, Inc. Newly constructed parapet walls are covered with architectural metal copings. The stick-framed canopy offers protection from the elements by way of a standing seam metal roof. The walls have a four-inch split-face masonry and Structurok veneer.
